DETAILED ACTION

Allowable Subject Matter

1. Claims 2, and 4 – 20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in a combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 4, for example, which include, compares a value of the detected output-light from the light source to a standard value of primary optical output determining primary optical output and adjusts the output-light of light source and the standard value of primary optical output is modified according to ratio of the primary value of the normalized low-frequency component to the subsequent value and an optical output is operated on the basis of the modified standard value.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
